Benefits: Medical, Dental, Vision, 401(k) with match, S125 FSA, EAP Life and Disability Insurance

Employment Type: Full Time

Department: Design

Overview

At Environments, we're passionate about design, workplace strategy and exceeding our customers' expectations. As the exclusive Knoll partner in Portland for over 27 years, design and workplace research guide all that we do. We are seeking a technical designer to join our team. The perfect candidate will have an interest in designing innovative workplaces: ones that inspire employees, and improve productivity. Someone who can take ideas and bring them to life through drawings, plans, and designs by utilizing technical skills, attention-to-detail, and creativity. You thrive in a fast-paced, team environment that delivers exceptional solutions to the customers we serve.

If you are an out-of-the-box thinker, committed to delivering best in class service to develop innovative, creative, and sustainable workplace solutions, we'd love to hear from you.

Responsibilities

The Technical Designer will primarily be responsible for, among others, the following duties:

- Preparation and production of computer-generated floor plans and technical specifications.
- Work with Project Team to formulate the best furnishing solutions for projects.
- Assist with proposals
- Manage project hours
- Perform project audits for other designers
- Provide design services to customers including programming, space planning, typical development, renderings, working/installation drawings, specification and site-to-plan review
- Working in a team environment with sales, account management, project managers, installation, and customers to ensure accurate plans and specifications for order entry
- Produce finished working drawings for specification and installation; validating plans against construction, electrical engineering and A&D drawing sets
- Produce and present design concepts to internal and external clients
- Perform field measures, product inventory and product research
- Assist with punch list and post-install specification to complete project

Qualifications:

- Bachelor's (BA) Degree in related field. A degree in Interior Architecture or Architectural Design would be a plus.
- A minimum of two years of experience as a CAD Designer. If experience is in furniture design or the furniture industry that is a definite bonus.
- Knoll dealership experience and mastery of Knoll product knowledge is a definite plus
- Mastery of specifications in CAD is required
- Experience in CAP and VI are a plus.
- A strong understanding of workplace environment issues (ancillary furniture, ergonomics, technology integration, and workplace strategy) is preferred.
- Strong design management skills and ability to juggle multiple programs/projects at a time to deliver on deadline
- Excellent Customer Service skills with a passion to provide solutions to meet customers' needs

Environments is an equal opportunity employer.
